Individuals enrolled in this program receive 30 days of hands-on training that equips them with essential patient care skills. A nursing instructor provides assistance in developing individuals and providing them with the skills they need to pass the certification exams. Individuals are also assigned a 24-hour clinical rotation at a local health provider partner. Passing the exam provides the individuals with an industry-recognized credential and license in the state of Georgia as a CNA.

TOPICS INCLUDE:

- Feeding & Dressing Patients
- Proper Patient Bathing
- Abuse & Neglect Prevention
- Recognizing Depression
- Dealing With Dementia
- Infection Control Issues
